

Setup Guide

1. Clone the Git repository to your local computer and open the folder in VS Code. Ensure all files are in the same directory.

IMPORTANT!

2. In the `.env` file, replace `OPENROUTER_API_KEY` with your actual API key.
 - Sign up at <https://openrouter.ai/>
 - After login, generate your key at <https://openrouter.ai/settings/keys>

3. Open the VS Code terminal, navigate to the project folder, and run:

```
python -m venv .venv
.\.venv\Scripts\Activate
pip install -r requirements.txt
python api.py
```

4. Wait for the model to load. Then, right-click `chat_ui.html` and select **Open with Live Server** (as shown below) to access the chat interface and start interacting with the RAG pipeline.
